- (2) Ball Bungees for bundling poles
- (6) Thumbscrews

Left StaBar Ell

Right StaBar Ell

StaBar 3-Way

Left Joint

Right Joint

3-Way Joint

(over, please)

1. Set up canopy completely.
2. Install StaBar 3-Way Joints on rear legs of canopy by slipping over legs and finger-tightening the thumbscrews. Do not use tools.
3. Install StaBar Ell Joints on front legs, using the Lef Joint on the lef leg (as seen from the customer's point of view). Install right Joint on right hand leg and tighten thumbscrews.
4. Connect male and female sections of poles to form three 10' long bars.
5. Beginning with the rear wall, click StaBars into corner joints, then install StaBars on the sides. Finger-tighten all thumbscrews.

Note – if set up on uneven terrain causes legs to be extended to differing heights, adjust joints to level before inserting the StaBars.
